INDIA 2024

During half term year 13 students from across TENC when to rural Tamil Nadu to see how the charity money we have raised has been used. We spent the week visiting the NGO's that 'Salt of the Earth' support, visiting local schools, sightseeing and visiting local villages to see how the community are being supported. This was an amazing trip; the students were brilliant ambassadors for TENC. We have all come away much humbler and grateful for what we have. The students will be doing an assembly in the next couple of weeks to all year groups to share their experience and to promote the trip for the current year 12, when they are year 13 in 2025!!

Check out our Instagram reels to see what they got up to.
